

# What is a Health Integration Team (HIT)?

- Locally evolved model to tackle important health and care priorities
- Self-formed groups
- Brings together patients and the public with healthcare professionals, researchers, managers and charities

# Our HITs focus on ...

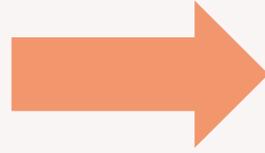

# What can a HIT do?

- Generate evidence to inform better health and care
- Provide platform for lived experience to influence service improvements
- Develop workforce skills
- Evaluate effectiveness of existing and new programmes
- Work with NHS to change national guidance

# How a HIT works

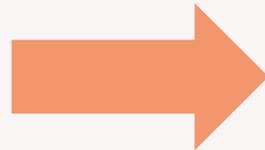

Funding  
(max £7K a year)

Project management  
(c. 0.1FTE)

Members' in-kind  
time contributions

Improvements in  
services and population health

**Income** £62M in last 3 years

**Policy influence**

**Workforce development**
